Profile

Computer Science BSc student at ELTE (graduating 2026) passionate about software development. Proficient in C#, Rust, and Linux-based development with experience building personal projects in various technologies. Fast learner, eager to explore new technologies, and comfortable working with Git version control.

Skills

Programming Languages: C, C#, Rust, Go, Python, Java, JavaScript

Frameworks/Technologies: .NET, WPF, Avalonia, Flask, ReactJS (basic)

Tools: Git, Linux, Visual Studio, VS Code, NeoVim

Education

Eötvös Loránd University (ELTE), Faculty of Informatics

Bachelor of Science in Computer Science

Expected Graduation: 2026

Projects

Echcell

In Progress — A lightweight spreadsheet application inspired by Excel for basic CSV files.

CLI Utilities (Rust)

Built simple command-line applications inspired by Unix tools like **grep** and **sed**.

Web-based To-Do Application (Flask, JavaScript)

Created a full-stack task management application using Python (Flask) for the backend and vanilla JavaScript for the frontend.

Simple Version Control System (Go)

In Progress — Developing a lightweight Git-style version control system from scratch to better understand internals of VCS.

HTTP Server (.NET Framework)

Implemented a basic HTTP server capable of handling simple GET requests.
